- Volunteer Program

## Handbook Overview

The purpose of the SAIS Abu Dhabi campus Parent-Student Handbook is to give students and their parents/guardians an understanding of school expectations and policies as well as provide pertinent information. The handbook includes detailed expectations for student attendance, behavior and discipline, including policies and consequences for bullying and harassment, due process rights related to discipline (including suspension, expulsion, and special education), and a description of both informal and formal complaint procedures that parents may pursue in the event of disagreements. SAIS Abu Dhabi annually updates the Parent-Student Handbook for distribution to families. Amendments to the handbook by SAIS may be made throughout the year.

Every student and his/her parent or guardian is required to sign and return an Acknowledgement Form at the beginning of each academic year establishing that they have read and understand the expectations and policies.

## School Vision

## SAIS-AUH education ensures that all students:

- Develop responsibility and self-direction
- Engage as compassionate members in a global society
- Lead by example in academics and community service
- Model individuality and embrace cultural diversity
- Actively seek understanding through breadth and depth of knowledge
- Rely on critical thinking

## Mission

The mission of SAIS-AUH school is to ensure each student achieves personal goals, develops individual purpose, and becomes college and career ready, in a culture distinguished by character, critical thinking, communication, collaboration, and creativity that promotes safety and social growth.

S- Social responsibility

A-Acceptance,

## Values

## State Standards

## MOE

 StandardsThe California Common Core standards provide a consistent, clear understanding of what students are expected to learn. The standards are a starting point for transforming the way students learn through problem solving in relevant real-world experiences. The standards are designed to help reflect the knowledge and skills that our students need for success in future college and career endeavors. SAIS-AUH focuses on fostering critical thinking by helping students develop complex problem-solving skills. California Common Core Standards are used for English, Math, Social Studies, Physical Education, Visual and Performing Arts, etc. Next Generation Science Standards/NGSS are used for Science.

The school follows the Ministry of Education (MOE) Curriculum for Arabic, Islamic, and UAE Social Studies. MOE curriculum is taught in Arabic. Islamic Studies is mandatory for all Muslim students. Alternative classes are offered for Non-Arab students and NonMuslim students.

## EAL PROGRAM AND SOD SUPPORT GESSONS

## EAL Program

At SAIS-Abu Dhabi we utilize the WIDA screener as a benchmark to identify a student's English proficiency skills in reading, writing, listening, and speaking. Utilizing this benchmark, we are able to identify students within the school who need additional foundational English support before they are able to function in the mainstream English class. Through the hard work of talented and highly qualified teachers, EAL students are provided support with our EAL Program which allows teachers to provide smaller teacher: student ratios and provide even further differentiated support to students to help them achieve proficiency in their English skills that will help them to achieve success in their mainstream classes.

Student Care and Support

SAIS-AUH is a school where learners feel at home. We believe that a safe learning environment contributes to student success and achievement. We lead our students to aim high by boosting their confidence. SAIS-AUH students are encouraged and appreciated for their achievements whether great or small. Our students take pride in their work and in themselves. SAIS-AUH Support Team seeks to create a school environment where students feel supported academically and emotionally. We make sure that all staff members are working to support the students with plans, activities, and appropriate follow-up to help them achieve success both inside and outside of the classroom. In addition to this we offer support for our students and staff about child protection, anti-bullying campaigns, health and wellness, etc. SAIS Support Team

## Academic Integrity Policy

SAIS Abu Dhabi values real mastery of subject content and has adopted high standards for honesty. Prohibited activities include:

- Cheating
- Plagiarism
- Any student determined to have cheated, plagiarized, or committed forgery will be subject to consequences which may include, but are not limited to the following:
- Receive a zero grade on the assignment or test
- Receive a failing grade for the class
- Receive an opportunity to retake test or complete assignment honestly
- Any student assisting in any of the above will also be subject to consequences. The instructor and administration will determine consequences based on the nature of the offense.

## Cheating

- Cheating on an assignment or test robs a student of any inherent value of the assignment or test. In addition, cheating may unfairly affect other students by changing a grading scale or curve.
- The choice to cheat on an assignment or test may reflect more serious academic issues including fear of failure, an outside of school schedule that prevents the student from completing work, and/or incorrect class placement. Whatever the cause, students who engage in cheating compromise their integrity, dignity, and self-worth.

All assignments should be considered individual unless specifically stated by the instructor as otherwise. Cheating includes:

- Exchanging assignments with other students, whether you believe the assignment will be copied or not.
- Using any form of assistance during tests or quizzes without the expressed permission of the instructor.
- Giving or receiving answers during tests or quizzes. It is the student's responsibility to secure his or her own paper, thereby removing the opportunity for another to copy.
- Taking credit for group work when you have not contributed an equal or appropriate share toward the end result.
- Accessing a test or quiz to determine the questions prior to the administration of the test.

## Plagiarism

- The ability to present thoughts and ideas clearly and coherently in a written form is a cornerstone of academic success. Plagiarism prevents students from developing the skills necessary for academic competence. Additionally, it prevents the instructor from providing appropriate feedback and assessment to assist the student in correcting any deficiencies in his or her writing.
- All assignments must be written in the student's own words. Quotations, thoughts and ideas taken from another's writing must be given appropriate credit in the paper.
- Plagiarism includes:
- Taking someone else's assignment, or portion of an assignment, and submitting it as your own
- Submitting material written by someone else, or rephrasing the ideas or thoughts of another, without giving the author's name and/or source
- Presenting the work of someone else, including tutors, friends, parents, or siblings, as your own
- Submitting purchased papers, in whole or in part
- Submitting papers from the Internet as your own, in whole or in part

## SAIS Abu Dhabi Grading Policies

Final Academic Grade

| \% Average | GPA | Comment |
| :--- | :--- | :--- |
| $84-100 \%$ | $3.67-4.33$ | Excellent |
| $76-<84$ | $2.67-3.66$ | Good |
| $68-<76$ | $2.00-2.66$ | Satisfactory |
| $60-<68$ | $1.67-1.99$ | Poor |

## High School Graduation <br> Requirements:

- SAIS-Abu Dhabi curriculum does more than prepare students for success at the college level; it helps them develop into independent, creative thinkers who will positively influence the world around them. High school curriculum seeks to further develop critical thinking, advanced writing and creative reasoning skills across all subject areas. High school students, in their course of study, will gain knowledge in fundamental areas as well as develop a sense of their own strengths and interests skills that are essential to success in college.
- All students are expected to work to their greatest potential and challenge themselves as they select their courses. A wide variety of electives allow each student to explore and expand their interests. Electives are designed to enhance our program and to allow students the flexibility to discover and nurture their abilities and interests.

## 2023-2024

Students in high school are required to take a certain number of credit hours in order to graduate from high school and enter university. The following is the breakdown of subjects and credit hours necessary for graduation from Sharjah American International School-Abu Dhabi.

- 4 credits of English
- 4 credits of Math
- 4 credits of Science (General Science, Chemistry, Physics, Biology)
- 2 credits of Physical Education/Health
- 3 credits of Social Studies
- 3.5 credits of Elective Courses
- Total amount of credits $\mathbf{= 2 0 . 5}$ credits (Excluding Arabic and Islamic)
- *For Non-Muslim students any courses they take will count as .5 C.U. to be added to their overall total of credits.
- The Country Citizen Students (Nationals) shall pass:
- a. EmSAT Achieve - English with a minimum grade of at least 1100 grades OR IELTS academics with 5

Or TOEFL with 61.

- b. EmSAT Achieve - Mathematics with a minimum grade of at least 500 grades OR Math SAT 1
- (Reasoning Test score of 450.
- The Non-Citizen/Expats Students shall pass:
- a. In English language one of the following tests:
-     - TOEFL English with a minimum grade of at least 61 grades in the online test for the students (iBT).
-     - Or the IELTS Academic with a minimum grade of at least 5.0 score.
-     - Or EmSAT Achieve - English with a minimum grade of at least 1100 grades
- b. A Mathematic test in one of the following tests:
-     - SAT I - Math Reasoning Test with a minimum grade of at least 450 grades.
-     - Or EmSAT Achieve - Mathematics with a minimum grade of at least 500 grades.
- c. 40 hours (Grades 9-12) of authenticated community service hours.
- Once our students graduate from high school, they will be eligible for university. With a high school diploma and transcript (subject to the completion of the graduation requirements)
***Participation in commencement exercises requires that all graduation requirements be satisfied one full day prior to the graduation ceremony.

## Valedictorian/Salutatorian

The valedictorian and salutatorian are designed to recognize the highest achieving students in each graduating class. The following criteria will be considered for the selection of each:

- Academic Rigor - the student engaged in academically challenging coursework (i.e. at least 2 Advanced Placement courses or the equivalent).
- Academic GPA 9-12 (weighted). - one of the top 10 students of the class when ranked according to Academic GPA, based on the first three years of high school, otherwise defined as through the first term of the student's senior year of high school.
- School Involvement - the student has been involved in leadership capacities within the school in one of the following areas:
- School Sponsored Club: either for multiple years (two or more) with the same club or with multiple clubs (at least two) or
- Sports: either one sport for multiple years (two or more) or with multiple sports (at least two) or
- Visual and Performing Arts performance groups (two years or two different groups)
- The student has demonstrated the School Mission, Vision, and Values
- Additional consideration will be given to students who complete all high school core classes at SAIS.

Recommendations for those students being considered for valedictorian and salutatorian will be brought forward to the Academic Leadership Team as follows:

- School Counselor will identify valedictorian and salutatorian candidates based on the selection criteria listed above.
- Academic Team will then determine the Valedictorian(s) and Salutatorian(s) using the selection criteria listed above.
- School officials reserve the right to rescind the offer of this honor due to a breach of the above criteria in the final term of the student's senior year.
- The Principal will have final say as necessary.
- Students and their parents are encouraged to carefully select classes in the Spring for the following school year. We realize that academic plans and goals change and therefore, students may need to make course adjustments. However, we also recognize the need for continuity in classroom instruction. In trying to balance the two issues, the following course change procedure will be in effect.
- Student or parent-initiated course change requests will only be considered during the first two weeks of the new term. After this time, course changes will only be made to address academic concerns.
- Course changes will only be made for academic or medical reasons. Requests to be placed in different courses based on personal preference (i.e. being with a friend), will not be honored
- In general, courses at SAIS Abu Dhabi are considered to be yearlong in nature. As a result, approval for term 2 or term 3 changes will only be considered for the purpose of addressing academic or medical concerns.
- Please see the School Counselor for information on making up necessary courses.

## Transfer Students

When a student comes in after the fourth week of a term, it becomes increasingly difficult for a teacher to adequately assess learning. Students who transfer in after four weeks should either have a transfer grade from the previous school or be aware that makeup work will be at the discretion of the teacher.

## English Courses and Core Electives

## GRADE 9

## GRADE 9 COURSES

## High School Course Descriptions G9 2023-2024

## English 9:

Ninth grade English is a year-long course designed to review and improve five basic English skills: reading, writing, speaking, listening, critical thinking. Students will engage in a comprehensive experience in literature and language. In writing, editing skills are emphasized, and various writing assignments are related to the reading of novels, plays, and short stories. Spelling and vocabulary development is connected to each literature unit as well as lessons from a textbook. In speaking, students are required to deliver several short speeches. Listening skills are enhanced through speech activities.

## Integrated Mathematios l:

The fundamental purpose of the Mathematics I course is to formalize and extend the mathematics that students learned in the middle grades. This course includes standards from the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability. Some standards are repeated in multiple higher mathematics courses; therefore, instructional notes, which appear in brackets, indicate what is appropriate for study in this particular course. For example, the scope of Mathematics I is limited to linear and exponential expressions and functions as well as some work with absolute value, step, and functions that are piecewise-defined. For the Mathematics I course, instructional time should focus on six critical areas: (1) extend understanding of numerical manipulation to algebraic manipulation; (2) synthesize understanding of function; (3) deepen and extend understanding of linear relationships; (4) apply linear models to data that exhibit a linear trend; (5) establish criteria for congruence based on rigid motions; and (6) apply the Pythagorean Theorem to the coordinate plane.

## High School Course Descriptions G9 2023-2024

## Biology:

Students in high school develop understanding of key concepts that will help them make sense of life science. The ideas are built upon students' science understanding of disciplinary core ideas, science and engineering practices, and crosscutting concepts from earlier grades. There are four life science disciplinary core ideas in high school: 1) From Molecules to Organisms: Structures and Processes, 2) Ecosystems: Interactions, Energy, and Dynamics, 3) Heredity: Inheritance and Variation of Traits, 4) Biological Evolution: Unity and Diversity. The performance expectations for high school life science blend core ideas with scientific and engineering practices and crosscutting concepts to support students in developing useable knowledge that can be applied across the science disciplines. While the performance expectations in high school life science couple particular practices with specific disciplinary core ideas, instructional decisions should include use of many practices underlying the performance expectations.

## Physical Education:

***Also offered in Grades 10, 11 and 12
Physical Education is a compulsory course that aims to develop physically literate individuals who have the knowledge and skills to move with confidence and competence in a wide range of physical activities. Through these physical activities, students will develop their physical motor skills, personal and social responsibility skills, application of knowledge and their passion for being active for life. Physical Education will also include Health units that are guided by the SHAPE Health standards focusing on learning and applying strategies to enhance one's well-being. Activities and programs may change depending on facility and ADEK regulations that may be set for 2022-2023.

## High School Course Descriptions

G9 2023-2024

## Geography:

Students are expected to use graphic tools to acquire and process geographic information. They will develop a special view of the world including cultural and physical characteristics of places and regions. This course focuses on the interactions between individuals, societies and the physical environment, both in time and in space. It investigates the ways that people adapt and respond to change and evaluates management strategies that are related to change. This course examines key global issues such as poverty, population, sustainability, and global climate change, and seeks to identify and understand the processes that lie behind various global patterns and trends.

## General Science:

In General Science, students will be introduced to the four major areas in science-energy and matter, the living world, planet Earth and space. Students thus become acquainted with the basic ideas upon which a number of sciences are built, including Physics, Chemistry, Biology, Earth Science and Astronomy.

Ninth Grade Elective Offerings

## High School Elective Course Descriptions G9 2023-2024

## Graphic Design-

**Also offered in Grade 10
Students in high school develop understanding of the "Design" notion, learn a brief history of it, how it started, and where it came from. How is it human nature, and why is it important? Then they move on to learning about graphic design, have some theoretical knowledge about it; a brief history, the way it started and so on. After that they learn the fundamentals of graphic design, the basic knowledge that is a stapler in design in general. And the first unit covers all of these ideas. The performance expectation is to improve their critical thinking skills before their technical skills, as the latter is easier to achieve.

Applied Art-
** Also offered in Grades 10,11 \& 12
Students in Applied Art courses will be immersed in abstract arts and paintings, along with traditional Emirati art designs similar to those inspired by the Emirati painter Abdul Kader AI Rais. Students also delved into warm and solid colors that were portrayed in their paintings, as well as the cubism and abstract art made famous by Pablo Picasso. The use of the elements and principles of art (such as line, form, color, texture, contrast, balance, motion, rhythm, etc.) will be explored in a variety of basic media including pencil, colored pencil, pastels, and mixed media. students will develop perceptual, observational, and compositional skills necessary to communicate a range of subject matter, symbols, ideas, and concepts using knowledge of drawing and painting media, processes, and techniques. The content includes but is not limited to, the use of tools and materials, art vocabulary, elements of art and principles of design, critical thinking, and analysis as well as historical and cultural perspectives.

# High School Elective Course Descriptions G9 2023-2024 

Fashion Design-
**Also offered in Grade 10
The purpose of this course is to advance students' knowledge of fashion design through the elements and principles of design as they pertain to fashion. Through this educational training, students will learn how to operate a sewing machine, understand the basics of following a pattern, learn how to take measurements, in order to design and create clothing. Students will be introduced to various textiles, fabrics and knitwear and how to manipulate them to create the latest fashion trends. Students will learn about the influence of social attitudes and culture on fashion trends and styles.

## Interior Design-

** Also offered in grade 10
Students will be introduced to a brief history of interior design and its various theories. They will be introduced to some applications and software. They will grasp some of the fundamental basics and apply them to real life cases, starting with their bedroom. They will learn to transform plain living spaces into beautiful and functional rooms. This course will teach you how to design every aspect of a room while taking into account color theory, industry trends, special arrangements, floor plans, design ideas, and interior design basics.

## leain

## Fiench

## High School Elective Course Descriptions G9 2023-2024

Speech \& Debate-
**Also offered in Grade 10
Speech and Debate is a co-curricular, competitive performance class that improves public speaking, argumentative capacity and helps to further develop students' critical thinking skill set. Debate teaches students how to participate in the rational exchange of ideas and arguments as they relate to significant social issues. Speech events sharpen speaking and/or acting skills. Students have learn techniques that control speech anxiety as well as help to structure and organize information presented to a variety of audiences. Students are required to perform in class and are presented the opportunity to speak at school wide and country wide TED talks.

## French Beginner-

* *Also offered in Grades 10 \& 11

In French 1, students begin to develop competence in four basic skill areas: listening, speaking, reading, and writing. While developing communicative competence in French, students gain and expand their knowledge of francophone countries and cultures. In addition to the default course program, French I includes extra alternate lessons, projects, and tests for use in enhancing instruction or addressing individual needs.

# High School Elective Course Descriptions G9 2023-2024 

Programming \& Coding-
**Also offered in Grades 10 \& 11
Is a course designed to introduce students to HTML, CSS and Java Script. This course introduces students to computer programming concepts and practices. Students will write and test computer programs, using various problem-solving strategies. They will learn the fundamentals of program design and apply a software development life-cycle model to a software development project.

Journalism:
** Also offered in Grades 10, 11 \& 12 Intro to Journalism covers a variety of skills in preparation for Yearbook, school newsletter, or the school broadcast system. Students will compose news stories by conducting interviews, meeting deadlines, photographing and videoing extracurricular activities, reflecting on current events and more. Students are required to cover news in both a written format and video broadcasting format. Students learn how Journalistic laws and ethics apply to Journalism. Students learn the basics of Adobe Photoshop and Adobe InDesign to design newspaper and yearbook pages. Students use Adobe Premiere Pro editing software for videos, including news packages and short films. Students have the opportunity to present their work to the student body via the school website and social media pages.

## GRADE 10

GRADE 10 COURSES

## High School Course Descriptions G10 2023-2024

## English 10;

English 10 continues the use of a workshop approach to the classroom, which develops reading, writing, and thinking skills that will be resonant throughout the school year. Students will write with an authentic audience in mind and will learn from established writers to add to their repertoire of writing decisions. Assigned texts are supplemented by student-selected independent reading of books, short stories, poems, and other texts, both online and print. While exploring a range of cultures, thoughts and global perspectives, students will gain confidence in their language and communication abilities.

## Integrated Mathematics II:

The focus of the Mathematics II course is on quadratic expressions, equations, and functions; comparing their characteristics and behavior to those of linear and exponential relationships from Mathematics I. This course includes standards from the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability. Some standards are repeated in multiple higher mathematics courses; therefore instructional notes, which appear in brackets, indicate what is appropriate for study in this particular course. For example, the scope of Mathematics II is limited to quadratic expressions and functions, and some work with absolute value, step, and functions that are piecewise-defined.

## High School Course Descriptions G10 2023-2024

## Chemistry:

The aim of this course is to help students build an understanding of modern chemistry. Throughout the year, students will be involved in problem-solving activities on an individual, small group and large group basis. Through this process the ability to read and understand problems, break them down into their component parts and then create and present solutions will be developed. The course is both quantitative and qualitative in nature, so mathematics will often be applied to the solving of problems. These same skills will be developed with activities in the chemistry laboratory. In that case, problem solving will be done in real time with hands-on problems. Through this process both analytical techniques as well as technological capability will be developed.

## Physical Education:

Grade 10 PE/Health is a compulsory one-year course that aims to develop physically literate individuals who have the knowledge and skills to move with confidence and competence and is designed to enhance student knowledge about wellness and promote lifelong activeness. Units may include nontraditional games, traditional sports, net games, aquatics, recreational activities such as table tennis or cycling, and fitness-based activities such as kickboxing or group fitness etc. The Health component of this course emphasizes the critical thinking and health-enhancing decision-making skills necessary for developing healthy lifestyles now and in the future. Activities and programs may change depending on facility and ADEK regulations that may be set for 2022/23.

## Tenth Grade Elective Offerings

## High School Elective Course Descriptions G10 2023-2024

Design and Technology-
** Also offered in Grades 11 \& 12
The study of Design and Technology develops a student's ability for innovative and creative thought through the planning and production of design projects related to realworld needs and situations. Students investigate existing solutions, analyze data and information, and generate, justify and evaluate ideas. Students experiment with tools, materials and technologies to manage and produce prototypes, products and solutions to identified needs and problems. Students undertaking Design and Technology learn to be creative and innovative in the development and communication of solutions. Students learn to identify, analyze and respond to needs through research and experimentation leading to the development of quality design projects. They learn about Work Health and Safety to manage and safely use a range of materials, tools and technologies to aid in the development of design projects. Students critically evaluate their own work and the work of others. Individual design projects provide students with opportunities to develop their project management skills.

## Fashion Design-

The purpose of this course is to advance students' knowledge of fashion design through the elements and principles of design as they pertain to fashion. Through this educational training, students will learn how to operate a sewing machine, understand the basics of following a pattern, learn how to take measurements, in order to design and create clothing. Students will be introduced to various textiles, fabrics and knitwear and how to manipulate them to create the latest fashion trends. Students will learn about the influence of social attitudes and culture on fashion trends and styles.

## High School Elective Course Descriptions

## G10 2023-2024

## English Literature-

**Also offered in Grades 11 \& 12
English Literature introduces the principles and techniques of fiction writing, examined through exercises and discussions of student and professional writing. This course helps develop a personal, advanced writing style and an appreciation of literary forms. Through exercises and projects, students practice using these tools to produce original, exciting works of literary art. Students will analyze a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. Along the way, students sharpened their ability to track these elements both in published texts and in the work of their classmates, and further develop how to measure aesthetic value. Students create several independent works of art, from children's books to short stories. Students explore several different types of writing, as well as responding to literature, art mediums, quotes, and music. Peer reviews and sharing ideas are essential elements to this course.

Business Studies 1
**Also offered in Grade 11
This course introduces students to the world of business. Students will develop an understanding of the functions of business, the contemporary business world including global business environment, understanding business ethics and social responsibility, entrepreneurship; In addition to managing the business and the people in organization including employee behavior and motivation in addition to leadership and decision making. This course builds a foundation for further studies in business and helps students develop the business knowledge and skills they will need in their everyday lives.

## High School Elective Course Descriptions G10 2023-2024

## AP Biology-

**Also offered in Grades 11 \& 12
The AP Biology course is an introductory college-level biology course. Students cultivate their understanding of biology through inquiry-based investigations as they explore the following topics: evolution, cellular processes, energy and communication, genetics, information transfer, ecology, and interactions.

## Human Anatomy-

** Also offered in Grades 11 \& 12

The course involves a systemic study of the body with an emphasis on the skeletal, muscular, nervous and cardiovascular systems. It is a foundational course for all areas of future study in health science and exercise science and it is a vital building block to subsequent course work.

ACCOUNTING Mí
$\qquad$

## High School Elective Course Descriptions G10 2023-2024

## French Intermediate

**Also offered in Grades 11 and 12
This course will help students review essential structures in further detail, improve your speaking, listening, reading and writing skills in French and prepare you for further study of French. Upon successful completion of this course sequence, students will be able to: 1) comprehend spoken French with sufficient ability to grasp the main idea and some supporting details in short conversations that relate to daily life and represent authentic situations. 2) speak French well enough to have short conversations with native speakers about a variety of topics using the present and past tenses.

## Accounting:

**Also offered in Grades 11 \& 12
This course introduces students to accounting concepts and principles, financial statements, internal control design, and accounting for partnerships. By the end of the course students are able to define terms related to business accounting, apply accounting concepts and principles, prepare financial statements, analyze financial statements for decision making, evaluate internal controls, account for partnership transactions, and differentiate international financial reporting standards from generally accepted accounting principles.

## High School Elective Course Descriptions <br> G10 2023-2024

## Programming/Coding I-

- Programming/Coding 1 is a course designed to introduce students to HTML, CSS and Java Script. This course introduces students to computer programming concepts and practices. Students will write and test computer programs, using various problem-solving strategies. They will learn the fundamentals of program design and apply a software development life-cycle model to a software development project. Students will develop the skills, including critical thinking skills, and the knowledge of strategies required to do research, conduct inquiries, and communicate findings accurately, ethically and effectively. They will apply the knowledge, skills and attitudes acquired through the study of computers to a variety of learning tasks and relate them to computer phenomena on the local, national and global levels. Students will develop lifelong learning habits that will help them adapt to computer advances in the changing workplace and world. This course will help students make connections that will help them take advantage of various potential postsecondary educational and work opportunities.

## Programming and Coding I

** Also offered in Grades 11 \& 12
s a course designed to introduce students to Python Programming language. During the duration of this course students will learn about the essentials of sequential and conditional code execution, iteration, logical operators and algorithms. The knowledge and skills acquired and practiced enable students to successfully perform and interact in a technology-driven society.

## GRADE 11

## GRADE 11 COURSES

Integrated
Mathematics

## High School Course Descriptions G11 2023-2024

## English 11:

In this course students will focus on critical thinking and will engage in specific reading, writing, and communication skills that will prepare them for career and college-level experiences. Students will also learn to evaluate critically what they read and write: they will explore representative works of American literature and respond to readings through discussion and writing. Emphasis will be placed on the writing process; modes include narratives, informational papers, persuasive essays, comparison/contrast compositions, and literary analyses. The research process is also explored.

## Integrated Mathematics 3:

Integrated Mathematics 3 is the third course of a three-course sequence. This course utilizes a problem centered approach and includes content, standards from Algebra 1, Geometry, Algebra 2, and Statistics at an intermediate to advanced level including: coordinated geometry, circles and other conic sections, binomial distributions, permutations and combinations, exponential and logarithmic functions, rates of change, derivatives, trigonometry, and quadratics. The course requires that students further develop the logic needed for abstract problem solving and emphasizes the common core standards through examining polynomial functions, exponents and logs, trigonometric functions, triangle trigonometry, trigonometric addition formulas, and solving trigonometric equations.

## Pre-Clalulus

 Lessons Practice Appleations
(U. 1 I)

## High School Course Descriptions G11 2023-2024

## History-

In this history course, students will learn about the age of revolutions and contemporary global issues of the modern world. They will overview ancient Influence on modern ideas, then will focus on the 18th, 19th and $20^{\text {th }}$-century events in history and their repercussions on world events today. It will promote the idea of event analysis over timelines.

## High School Elective Course Descriptions

## G11 2023-2024

Psychology:
***Also offered in Grade 12
This course provides learning experiences which introduces students to major theories as they apply to education, human development and human needs. Likewise, students will become familiar with educational terminology, language and methodologies relevant to the educational field. Given this basis of introductory knowledge, students will begin to reflect and apply principles of best practice in structuring learning opportunities for all students, performing and evaluating investigations, and communicating their findings.

## Economics:

***Also offered in Grade 12
This course examines current UAE and international economic issues, developments, policies, and practices from diverse perspectives. Students will explore the decisions that individuals and institutions, including governments, make in response to economic issues such as globalization, trade agreements, economic inequalities, regulation, and public spending. Students will apply the concepts of economic thinking and the economic inquiry process, as well as economic models and theories, to investigate, and develop informed opinions about, economic trade-offs, growth, and sustainability and related economic issues.

## Probability \& Statistics

## High School Elective Course Descriptions G11 2023-2024

Statistics \& Probability-

**Also offered in Grade 12
The key components in probability are probability terms, the concept of the probability of an event, predicting and determining probabilities, expected value, the relationship between theoretical and experimental probabilities, and compound events. In statistics, the key components are data collection, organization, representation, sampling, centra tendency, variance and correlation, and analysis and inference. Probability and Statistics are the mathematics used to understand chance and to collect, organize, describe, and analyze numerical data. From weather reports to sophisticated studies of genetics, from election results to product preference survey, probability and statistical language and concepts are increasingly present in the media and in everyday conversations. Students need this mathematics to help them judge the correctness of an argument supported by seemingly persuasive data.

## Advanced French-

**Also offered in Grade 12
In this Advanced French course students cultivate their understanding of French language and culture by applying interpersonal, interpretive, and presentational modes of communication in real-life situations as they explore concepts related to family and community, personal and public identity, beauty and aesthetics, science and technology contemporary life, and global challenges.

## High School Elective Course Descriptions

## Forensic Science-

**Also offered in Grade 12
Forensic Science is an introductory course in which students will apply their prior knowledge of biology, chemistry, physics and mathematics to the popular field of crime scene investigation. Students will use a structured and scientific approach to the investigation of crime of assault, abuse and neglect, domestic violence, accidental death homicide, and the psychology of criminal behavior. Students will learn terminology and investigate procedures related to crime scene, questioning, interviewing, criminal behavior characteristics, truth detection, and scientific procedures used to solve crimes. Using scientific methods, students will collect and analyze evidence through case studies and simulated crime scenes such as fingerprint analysis, ballistics, and blood splatter analysis. Students will learn the history, legal aspects, and career options for forensic science.

Organic Chemistry-
**Also offered in Grade 12
This course is designed to provide background in the fundamentals of nomenclature, mechanisms, structures, and synthesis of carbon-based compounds. This course is designed for science and health science majors who desire a general rather than a detailed knowledge of the compounds of carbon. Topics to be covered include structure and bonding; acid/base chemistry; stereochemistry. Functional groups to be covered include hydrocarbons, alcohols, ethers, aldehydes and ketones, carboxylic acids, carboxylic acid derivatives, and amines. Laboratory work will include common organic techniques and experiments supporting the principles covered in lecture.

## 물 COMDUTER SCIENCE $\square$

## Business Studies

## High School Elective Course Descriptions <br> G11 2023-2024

Advanced Accounting-
**Also offered in Grade 12
This course introduces students to a wider vision of management accounting and finance. By the end of the course, students will develop an understanding and analysis about the relevance and behavior of cost, calculate costs including variable, fixed costs and full costing. In addition, students will be able to prepare different types of budgets and analyze budgets. Furthermore, students will be introduced to finance, make capital investment decisions, calculate different investment appraisal methods and analyze them and they will also be ready to know how to finance a business and manage working capital.

## Computer Science-

**Also offered in Grade 12
This course includes hands-on practice and will give you a solid knowledge of the Java and C++ Programming languages. Students will be able to identify benefits, program in basic syntax, include data types, control statements, functions, argument passing, arrays, and strings. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools. Students will design, construct, and test programs with primarily scientific, mathematical, and business applications.

Business Studies II-
**Also offered in Grade 12
This course helps students to have a wider vision of business. Students will develop an understanding and analysis of marketing principles mainly building relationships with customers for competitive advantage including marketing processes and consumer behavior in addition to developing, pricing, distributing and promoting products. Moreover, students wil be able to manage information for better business decisions through information technology, information system and accounting. Besides, students will develop an examination about financial systems, issues in financial management, financial institutions and will be able to manage the finance of a business. This course will help students develop further business knowledge and skills they will need in their daily lives.

High School Course Descriptions G12 2023-2024

English 12:
The aim of the Grade 12 English course is to analytically and rigorously engage the student to become a more critical reader, writer, and speaker, and listener for a variety of purposes. S/he should be able to actively read a variety of literary works, looking for and interpreting the author's key assumptions, ideas, reasons, and justifications. S/he should respond to literature in order to understand, explain, and evaluate the literary work. S/he should further develop and bolster grammar skills in order to become more effective and proficient in written and spoken communication. Students will be afforded many opportunities to better prepare for EMSAT, IELTS and SAT courses.

## Geology:

Geology is an in-depth study of how the earth is constructed and the processes that have formed the earth and continue to change the Earth's surface. Topics will include: the understanding of the formation and identification of rocks and minerals; the types of volcanoes and how and why they erupt; the weathering of rocks and their effects on Earth's surface and human populations; rivers and groundwater and the ecological impacts of humans on water sources; glaciers, deserts, beaches, and the ocean floor; earthquakes and their relationships to plate tectonics and the effects on humans; how mountains form; and fossils and their relationships to Earth's past.

## High School Course Descriptions G12 2023-2024

## Sociology:

Sociology will help students to acquire knowledge, skills and attitudes so as to develop an informed and critical understanding of social, environmental, historical and political issues so as to reinforce and stimulate curiosity and imagination about local and wider environments. The Curriculum provides a strong foundation to enable students to foster an understanding of, and concern for, the interdependence of all humans and living things. High school sociology focuses on many different aspects of human behavior and life. The class covers how ethics vary in different cultures, groups and societies, the cultural trends that affect how society operates, and how to work well with people from different backgrounds.

## Advanced Math:

Integrated Math 4 expands on topics introduced in Integrated Math 1, 2 and 3 with emphasis on simplifying and solving equations, transforming graphs, interpreting key features of functions, and modeling real-life scenarios. Students will make connections between the various mathematical representations of polynomial, exponential, absolute value, logarithmic, radical, rational, and trigonometric functions. Additionally, students will analyze and make conclusions about univariate and bivariate data. In order to be successful in this course, students are expected to have mastered key Integrated Math 3 concepts.

## Twelfth Grade Elective Offerings

Applied Art

# High School Elective Course Descriptions <br> G12 2023-2024 

Programming and Coding 2:
Programming/Coding 2 is a course designed to introduce students to Python Programming language. During the duration of this course students will learn about the essentials of sequential and conditional code execution, iteration, logical operators and algorithms. The knowledge and skills acquired and practiced enable students to successfully perform and interact in a technology-driven society. Students enhance reading, writing, computing, communication, reasoning skills and apply them to the information technology environment. This course is essential for students who are interested in careers in Engineering, Cyber Security, Artificial Intelligence and Computer Science

## Graphic Design:

Students in high school develop an understanding of the "Design" notion, learn a brief history of it, how it started, and where it came from. Graphic Design is a class that teaches art and technology. In this class, students will use design as a creative process in communication. Students will also explore various methods used to create and combine words, symbols, and images to create a visual representation of ideas and messages. Students will use the basic elements and principles of art and also learn how to use the computer programs Adobe Photoshop and Adobe Illustrator.

## High School Elective Course Descriptions <br> G12 2023-2024

English Literature:
English Literature introduces the principles and techniques of fiction writing, examined through exercises and discussions of student and professional writing. This course helps develop a personal, advanced writing style and an appreciation of literary forms. Through exercises and projects, students practice using these tools to produce original, exciting works of literary art. Students will analyze a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. Along the way, students sharpened their ability to track these elements both in published texts and in the work of their classmates, and further develop how to measure aesthetic value. Students create several independent works of art, from children's books to short stories. Students explore several different types of writing, as well as responding to literature, art mediums, quotes, and music. Peer reviews and sharing ideas are essential elements to this course.

## AP Calculus AB:

AP Calculus AB is the study of limits, derivatives, definite and indefinite integrals, and the Fundamental Theorem of Calculus . Concepts will be expressed and analyzed geometrically, numerically, analytically, and verbally.

# High School Elective Course Descriptions <br> G12 2023-2024 

AP Physics-
In this course, students cultivate their understanding of physics through classroom study and activities as well as hands-on laboratory work as they explore concepts like change, force interactions, fields, and conservation. The course content is organized into seven commonly taught units, which include, Kinematics, Newton's Laws of Motion, Work, Energy, and Power, Systems of Particles and Linear Momentum, Rotation, Oscillation and Gravitation.

## Journalism:

Intro to Journalism covers a variety of skills in preparation for Yearbook, school newsletter, or the school broadcast system. Students will compose news stories by conducting interviews, meeting deadlines, photographing and videoing extracurricular activities, reflecting on current events and more. Students are required to cover news in both a written format and video broadcasting format. Students learn how Journalistic laws and ethics apply to Journalism. Students learn the basics of Adobe Photoshop and Adobe InDesign to design newspaper and yearbook pages. Students use Adobe Premiere Pro editing software for videos, including news packages and short films. Students have the opportunity to present their work to the student body via the school website and social media pages.

# High School Elective Course Descriptions <br> G12 2023-2024 

Business Studies II
Students will develop an understanding and analysis of marketing principles mainly building relationships with customers for competitive advantage including marketing processes and consumer behavior in addition to developing, pricing, distributing and promoting products. Moreover, students will be able to manage information for better business decisions through information technology, information system and accounting. Finally, students will develop an examination about financial systems, issues in financial management, financial institutions and will be able to manage the finance of a business. All in all, this course will help students develop further business knowledge and skills they will need in their daily lives.

## Probability and Statistics:

The key components in probability are probability terms, the concept of the probability of an event, predicting and determining probabilities, expected value, the relationship between theoretical and experimental probabilities, and compound events. In statistics, the key components are data collection, organization, representation, sampling, central tendency, variance and correlation, and analysis and inference. Probability and Statistics are the mathematics used to understand chance and to collect, organize, describe, and analyze numerical data. From weather reports to sophisticated studies of genetics, from election results to product preference survey, probability and statistical language and concepts are increasingly present in the media and in everyday conversations. Students need this mathematics to help them judge the correctness of an argument supported by seemingly persuasive data.

## Programming and Coding II

Programming/Coding 2 is a course designed to introduce students to Python Programming language. During the duration of this course students will learn about the essentials of sequential and conditional code execution, iteration, logical operators and algorithms. The knowledge and skills acquired and practiced enable students to successfully perform and interact in a technology-driven society. Students enhance reading, writing, computing, communication, reasoning skills and apply them to the information technology environment. This course is essential for students who are interested in careers in Engineering, Cyber Security, Artificial Intelligence and Compute Science.

## Physics Calculus Based

It's an introductory physics course intended for science and engineering, students wil cover measurement, Newton's Laws of Motion, gravity, work and energy, momentum, rotational motion, static equilibria, fluids, oscillations, conservation laws, waves, sound, temperature, heat transfer and thermodynamics. Lecture and laboratory.

## High School Elective Course Descriptions <br> G12 2023-2024

#### Abstract

Organic Chemistry: This course is designed to provide background in the fundamentals of nomenclature, mechanisms, structures, and synthesis of carbon-based compounds. This course is designed for science and health science majors who desire a general rather than a detailed knowledge of the compounds of carbon. Topics to be covered include structure and bonding; acid/base chemistry; stereochemistry. Functional groups to be covered include hydrocarbons, alcohols, ethers, aldehydes and ketones, carboxylic acids, carboxylic acid derivatives, and amines. Laboratory work will include common organic techniques and experiments supporting the principles covered in lecture.

\section*{Design and Technology:}

The study of Design and Technology develops a student's ability for innovative and creative thought through the planning and production of design projects related to realworld needs and situations. Students investigate existing solutions, analyze data and information, and generate, justify and evaluate ideas. Students experiment with tools, materials and technologies to manage and produce prototypes, products and solutions to identified needs and problems. Students undertaking Design and Technology learn to be creative and innovative in the development and communication of solutions. They learn to identify, analyze and respond to needs through research and experimentation leading to the development of quality design projects. They learn about Work, Health and Safety to manage and safely use a range of materials, tools and technologies to aid in the development of design projects. Students critically evaluate their own work and the work of others.

## High School Elective Course Descriptions <br> G12 2023-2024

## Applied Art:

Students in Applied Art will be immersed in abstract arts and paintings, along with traditional Emirati art designs similar to those inspired by the Emirati painter Abdul Kader Al Rais. Students also delved into warm and solid colors that were portrayed in their paintings, as well as the cubism and abstract art made famous by Pablo Picasso. The use of the elements and principles of art (such as line, form, color, texture, contrast, balance, motion, rhythm, etc.) will be explored in a variety of basic media including pencil, colored pencil, pastels, and mixed media. students will develop perceptual, observational, and compositional skills necessary to communicate a range of subject matter, symbols, ideas, and concepts using knowledge of drawing and painting media, processes, and techniques. The content includes but is not limited to, the use of tools and materials, art vocabulary, elements of art and principles of design, critical thinking, and analysis as well as historical and cultural perspectives.

## Human Anatomy-

** Also offered in Grades 11 \& 12

The course involves a systemic study of the body with an emphasis on the skeletal, muscular, nervous and cardiovascular systems. It is a foundational course for all areas of future study in health science and exercise science and it is a vital building block to subsequent course work.

- Shariah American International School-Abu Dhabi
- Requirements for Graduation
- 2023-2024
- Students in high school are required to take a certain number of credit hours in order to graduate from high school and enter university. The following is the breakdown of subjects and credit hours necessary for graduation from Sharjah American International School-Abu Dhabi.
-     - 4 credits of English
-     - 4 credits of Arabic - (required for all native speakers)
- 4 credits of Math
- 4 credits of Science (General Science, Chemistry, Physics, Biology)
-     - 2 credits of Physical Education/Health
- 3 credits of Social Studies
- 2 credits of Islamic
- 3.5 credits of Elective Courses
- Total amount of credits $=20.5$ credits (excluding the Arabic and Islamic)

Grade 11B

## HIGH SCHOOL TIMETABLE SAMPLE

## Assessments- Internal

## Assessments

Students from G5-G12 take internal assessments throughout each term including but not limited to: diagnostic pretests, ongoing assessments, midterm exams, and final exams. These assessments are used to track student attainment of curriculum goals across a wide range of subjects. Students receive study guides at least two-three weeks prior to these assessments so they have plenty of time to prepare. The results of the internal assessments provided detailed information to teachers about student learning targets met each term. This information also helps teachers revise the curriculum in the next term to meet individual student needs and goals.

## Assessments- External

## NWEA Map Testing-

Here at SAIS- Abu Dhabi, our students in G6-G9 take the Map test during three windows throughout the course of the academic school year. Map assessments are computer adaptive and produce accurate, reliable data that reveal the precise learning level of every student, regardless of the student's ability or grade level. Map identifies areas of strength and opportunity at the goal level of a subject, as well as overall performance.

## CAT 4 Testing-

The Cognitive Abilities Test (CAT4) is a diagnostic assessment that is designed to help students and their teachers understand how they learn and what their academic potential might be. It assesses how students think in areas that are known to make a difference to learning. Our students in G6-G12 take the CAT 4 test once upon joining the school so we can identify their learning styles and incorporate that into differentiated instruction within the classroom.

IBT Arabic Testing-
To meet the expected standards of attainment of Arabic Language Proficiency, our school participates in taking the IBT Arabic exam conducted by ACER. The IBT Arabic assessment is designed to give an international benchmark of your child's performance vs. other participating countries in the region and around the world.

## Assessments

## Assessments- External

PSAT- The Preliminary SAT, also known as the PSAT/NMSQT ${ }^{\circledR}$ (National Merit Scholarship Qualifying Test), is a practice version of the SAT exam. You can only take the PSAT once per year, and many students take the test in both 10th and 11th grade. The PSAT is 2 hours and 45 minutes long and tests your skills in reading, writing, and math. Unlike the SAT, the highest score possible on the PSAT is 1520.

SAT- The SAT is an entrance exam used by most colleges and universities to make admissions decisions. The SAT is a multiple-choice, pencil-and-paper test created and administered by the College Board. The purpose of the SAT is to measure a high school student's readiness for college, and provide colleges with one common data point that can be used to compare all applicants. Most high school students take the SAT, the ACT, or both during the spring of their junior year or fall of their senior year. It's important to leave time to re-take the test if you need to raise your score before you apply to college.

EMSAT- The Emirates Standardized Test EmSAT is one of the requirements for university admission to government higher education institutions in the UAE. It is a requirement for all native students to take both the EMSAT for English and the EMSAT for Mathematics.

IELTS- An English Language Proficiency Test for higher education. IELTS determines reading, writing, listening and speaking abilities to asses if a persons language is suitable for an academic environment.

ORITISH

- Grade 12 students are strongly recommended to take the EmSAT exams as soon as the registration windows open. The EmSAT scores are required for university admission application.
https://emsat.moe.gov.ae/emsat/ emsat register en.aspx
- National Admissions \& Placement Office (NAPO) is responsible for processing applications only from Emiratis and students whose mothers are Emiratis for admission to institutions of higher education in the UAE, and scholarship applications for universities abroad.
- https://www.moe.gov.ae/En/EServi ces/ServiceCard/pages/Registration Public.aspx

## Medical course outside of the UAE requirements

## UCAT

UNIVERSITY CLINICAL APTITUDE TEST

- 2 hours duration
- Verbal Reasoning, Decision Making, Quantitative Reasoning, Abstract Reasoning, and Situational Judgement.
- 225 questions
- Computer-based
- Score ranges 1200-3600
(1) Cambridge Assessment Admissions Testing

BIOMEDICAL ADMISSIONS TEST

- 2 hours
- Problem solving, critical thinking, writing task
- 59 questions
- 1 essay
- Computer-based
- Score ranges 1-9
- Essay score: 1-5/A-E

## Post-Graduation Requirements

## - Step 1 Attest the Report

 Card from ADEK through TAMM portal.- Step 2 Request for Certificate of Completion for High School Graduates through TAMM portal.

- Step 4 Apply for Equivalency Certificate through the MoE (Ministry of Education) website.
- Step 5 (for study abroad) Apply for attesting the Educational Certificates from MOFAIC (Ministry of Foreign Affairs and International Cooperation) ONLY for graduates who wish to apply in universities outside the UAE. For this, you may apply through the MOFAIC website.

# Registration to National Service 

Definition: It is the service that whoever decides to recruit must perform for the sake of the country for a specified period of time in accordance with the provisions of this law

## Conditions for joining the national service:

- To be a citizen of the country, has (passport + family book of citizens)
- He must have reached eighteen years of age and not more than thirty years of age
- To be medically fit
- Approval of the National Service and Reserve Committee
- Guardian consent for females

## Duration of Service:

## Males

- 3 years for those with a qualification less than high school
- (11) months for holders of a high school diploma or its equivalent or higher

## Females

- (11) months regardless of academic qualification

## Leadership and Personality Development Programs

SAIS-AD endeavors to nurture the leadership potential of all of our students from KG to Grade 12 students by providing various platforms including but not limited to:

- Student Council
- Happiness Committee
- House Captains
- Class Prefects
- Membership in national and international organizations.

## Community Outreach

SAIS AD has founded partnerships with the following organizations such as:

- Make a Wish
- Red Crescent
- Abu Dhabi Libraries (Department of Culture \& Tourism
- Others

## Scholarships

The UAE Government provides generous scholarship programs for students aspiring to pursue degrees of higher education in the UAE and abroad. It is important to learn the eligibility requirements for each scholarship program.

## SAIS CODE OF CONDUCT POLICY

## 2023-2024

## Responsibilities:

## Managerial Responsibility:

The school management is responsible for ensuring that our learning environment is completely safe and discipline that includes rules, ways of encouraging and affirming student efforts, rewards, penalties', and implementation procedures.

Ensure through regular review of the behavior policy, involve students, parents, teachers and other staff that the behavior policy is understood and accepted by all members of the school community.

- Establish the school pastoral Committee.
- Develop, implement and regularly review the School's policies and procedures for promoting good attendance, and follow up on excessive absence including truancy, and ensure full compliance with the Council's requirements.
- Ensure that the School's attendance policies and procedures are implemented and adhered to.
- Ensure effective administration of student attendance and recording daily attendance at all lessons.
- Provide clear information about the consequences of poor attendance to Parents/Guardians, students and School staff. - Set procedures for dealing with poor attendance and tardiness.
- Recognize students with exemplary attendance records.

## Responsibilities:

## Teachers Responsibility:

- Staff will take every opportunity to raise students' awareness and understanding of the many issues related to behavior and discipline through effective use of HALP, Student Government , Islamic Education and Moral Education,
- School staff should consider themselves responsible at all times for the behavior of students within sight or sound of them and should respond promptly and firmly to any instances of unacceptable behavior.
- Exert efforts to establish the motivation behind and the purpose of the student's misconduct ,in order to respond to it with suitable solution ,rather than simply taking a punitive approach.

## Responsibilities:

## Parental Responsibility \& Student Responsibility Attitudes and Behavior

## Parent responsibility:

- Parents should provide a conducive home environment as it plays a crucial role in shaping attitudes that produce good behavior in schools. It is therefore important that parents should be aware of the aims, values and the nature of expected behavior of the school.

## Student Responsibility Attitudes and Behavior:

- SAIS students are expected to demonstrate high standards of behavior at all times. This includes moving around the school, in tutor time and assembly, in the social areas and on the way to and from school.
- Appropriate action will be taken by the school against any students whose behavior is unacceptable and undermines the good discipline or reputation of the school.
- The cornerstones of standards of students' behavior are respect for oneself, respect for others, respect for the school and local community, and respect for the environment.

## Responsibilities:

## SAIS Monitoring and Support Team:

SAIS-AUH is a school where learners feel at home. We believe that a safe learning environment contributes to student success and achievement. We lead our students to aim high by boosting their confidence. SAIS-AUH students are encouraged and appreciated for their achievements whether great or small. Our students take pride in their work and in themselves. SAIS-AUH Support Team seeks to create a school environment where students feel supported academically and emotionally. We make sure that all staff members are working to support the students with plans, activities, and appropriate follow-up to help them achieve success both inside and outside of the classroom. In addition to this, we offer support for our students and staff about child protection, anti-bullying campaigns, health and wellness, etc.

## DEFINITION(S):

For the purposes of this policy, attendance refers to the total number of school days attended by the student during the school year based on the School calendar.

## Responsibilities:

## Attendance:

## PURPOSE(S):

To ensure that students are attending all classes and activities that result in their understanding of the curriculum and the subjects being taught. - To set out the Council's expectations in relation to full attendance at School by all students without exception, through a clear policy and effective communication with Parents/ Guardians. POLICY: At the beginning of the academic year, each School shall issue to Parents / Guardians its Council-approved attendance policy setting out procedures to deal with absences and to ensure that students punctually and regularly attend School and all lessons, and that all attendance data is accurately recorded.

Basic requirements and responsibilities in relation to students' attendance at School are as follows and reflected in the School's attendance policy:

- Students are expected to attend School on every school day as specified in the School calendar.
- Students shall arrive at School punctually every day, attend morning assembly, and attend classes on time.
- Teachers shall maintain a record of attendance by students for every lesson.
- Schools will maintain accurate daily attendance data for each student, including timely or late arrival to School.
- Parents / Guardians will make every effort to ensure that their children attend School every school day and arrive on time.
- If students need to be absent from School for a particular day, Parents/Guardians must inform the school accordingly.
- When a student returns to school following an absence, Parents/Guardians must send a signed note to the School indicating the reason for the student's absence.
- Students are responsible for completing all assignments missed during their absence.
- Parents/Guardians should seek to ensure that family vacations take place during scheduled school holidays.

## DEFINITION(S):

For the purposes of this policy, absence refers to the days when students fail to attend School. A student who does not miss a single class throughout the year is said to have a $0 \%$ absence record or a $100 \%$ attendance record. Absence rates above $10 \%$ should be regarded as a cause for concern. Authorized absences are to be distinguished from unauthorized absences or truancy.

## Responsibilities:

## Absence:

## PURPOSE(S):

- To encourage students to attend all classes in a timely manner, so that they maximize the educational benefit of being in School.
- To ensure that unauthorized absences are dealt with firmly and effectively.
- This policy is linked to attendance policy, which highlights the need for students to punctually and regularly attend School and all lessons. Schools shall seek to achieve low absence rates by:
- Following up on all unexplained absences immediately.
- Providing a safe, caring and engaging learning environment that encourages and stimulates students.
- Recognizing and rewarding excellent or improved student attendance.
- Implementing strategies and programs to address attendance problems for individual students.
- Providing clear and specific information about the rules and consequences of poor attendance to Parents/Guardians, students and School staff.

## Responsibilities:

Absence:

Types of Absences Authorized Absences The following types of absences may be regarded as authorized when confirmed by a signed letter from Parents/Guardians or by way of official documents:

- Illness.
- Death of first or second degree relative.
- Scheduled doctor appointments.

Official community task.
Mandatory appearance before an official body.
Essential urgent family travel for matters such as medical treatment or the death of a family member.

Unauthorized Absences The following types of absences are to be regarded as unauthorized:

- Shopping trips.

Unnecessary travel
Other types of absences not included in the authorized absences list.
Students are considered to be truant if they are absent from School without their Parents'/Guardians' knowledge or consent, or if Parents/Guardians have colluded with the student so that they are absent without authorization. Truancy is an unauthorized absence, and Schools must immediately inform the student's Parents/Guardians of incidents of truancy and shall hold discussions with them and the student and closely monitor the student's attendance. If an absence is authorized, the student has the right to make up the work and tests that were missed. If an absence is unauthorized, the School will agree with the Parents/Guardians on the appropriate course of action pending completion of the investigation into the circumstances surrounding the absence. School administration will excuse students for being late in the morning during days with adverse weather conditions (e.g. heavy fog). Parents/Guardians who plan to have their children miss several days of School are required to notify the School at least ten days before the anticipated absence, in order to allow teachers time to prepare the list of assignments that will be missed during the absence. The student or Parent/Guardian shall be responsible for contacting the School administration to learn of all assignments and tasks given to the student. These assignments must be completed by the student and returned to the relevant teachers either before leaving or shortly after returning from the absence.

## A. The SAIS Code of Conduct:

It is the right of every individual and groups at SAIS to feel safe and to have a peaceful, dignified existence, without being hindered by the behavior, attitude or noise level of others. In order that this may happen, it is essential that every member of the school community is:

- Considerate - respecting other individuals' right to a peaceful, dignified existence; making sure that words and actions do not cause inconvenience or offence to others;
- Courteous - being polite and helpful at all times;
- Co-operative - being willing to work with others;
- Friendly - being on good terms with others;

Hardworking - doing our best;
Honest - being truthful; respecting the property of other people;

- Respectful - of the culture, values and traditions of others;

Responsible - being accountable, reliable and responsible for our actions.

What this means in practice is that I should:
Be Punctual - always arrive to school \& class on time;

- Speak Considerately - avoid shouting, swearing and offensive language;
- Be Ready for lessons - have the necessary materials;
- Clear Up - after lessons and break, use the rubbish bins

Be Safe and Sensible - move in an orderly way - avoid running and use paths; hold doors open for other people; be aware of our own \& others' safety;
Negotiate - if I know there might be a problem, go and talk about it to someone;
Respect - for authority, property and the rights of others

## B. SAIS staff members are committed to:

- Maintaining a caring school environment which fosters self-esteem, where young people are accepted, respected and listened to.
- Being alert and responding to signs of distress or suspected incidents of harassment and bullying in class and at play areas.
- Providing appropriate counseling \& support to both those being bullied \& bullies.

Modeling appropriate behavior
Ensuring that supervision duties are carried out proactively \& responsibly to ensure student safety.
Following-up all reported cases of bullying or harassment.

## C. SAIS Stepped Approach to Behavior Management

As per UAE law \& SAIS policy, corporal (physical) punishment \& humiliation are strictly prohibited. Any teacher using physical punishment (including putting in the sun as a punishment, hitting, slapping, pinching, pushing, dragging, denying water or toilet trips (when it is necessary and urgent), namecalling, swearing, insulting etc) will be disciplined.

## CONDUCT VIOLATIONS

Refer the student to specialized centers for behavior modification by the order ofdeputy minister for academic affairs.
7. Blocking student's registration in any public schools and transferring him/her tocontinuous education.

- Final dismissal for the student in case all methods are exhausted.

NO BULLY 28 ZONE

## BULLYING

Bullying is totally unacceptable and is not tolerated at SAIS. All SAIS family members are treated with respect, regardless of their gender, religion, appearance, race, and ability, ethnic or social background.

## What is Bullying?

- Bullying occurs when a person or a group of persons deliberately and repeatedly hurt, upset or frighten somebody less powerful than themselves.

## Bullying includes:

- Name calling, teasing, ridiculing, sarcasm
- Putting down others and their achievements
- Touching people in ways they don't want to
- be touched
- Damaging, stealing, removing or hiding
- others' belongings
- Making comments/gestures to another of a
- sexual nature
- Making negative comments about family,
- country of birth, nationality, ability or
- religion
- Making inappropriate comments about
- another's physical appearance or clothes
- Physical violence or threats
- Forcing others to act against their will
- Spreading rumors/gossip
- Demands for money or possessions
- Purposely leaving someone out of activities
- Glaring and menacing gestures
- Telephone/Cyber bullying
- Writing offensive notes or graffiti, email

## There are no Acceptable Excuses for Bullying:

- "I WAS JUST PLAYING AROUND. CAN'T THEY TAKE A JOKE?"
- This is the most common response to bullying. It is not a joke to make someone feel miserable. This is bullying.
- "I'LL IGNORE IT AND IT WILL GO AWAY"
- If anything, ignoring it makes it worse. It gives the bully the impression that their bullying is OK and that you agree with what the bully is doing
- "ONLY WEAK PEOPLE TELL TALES"
- It takes courage and strength of character to stand up for your rights and those of others. Bullying continues when people do nothing.
- "I DON'T WANT TO CAUSE TROUBLE"
- All members of the SAIS family have the right to feel safe at school. You are not causing trouble by telling someone about bullying; you are standing up for yourself and others' rights.
"NO ONE CAN DO ANYTHING ABOUT IT"
Most cases of bullying are sorted out very simply, especially if it is reported straight away. We are committed to solving these problems.
- "THEY ASKED FOR IT"
- Nobody asks for it or deserves it.

## Makeup Work

- Students are responsible for work missed while absent.
- The teacher can assist the student in obtaining a list of class assignments that need to be completed in a timely manner.
- Students who are absent should be proactive in finding out from their teacher(s) what was missed during their absences from school.
- Generally speaking, there is one day granted for each day of an excused absence in order to turn in the makeup work in a timely fashion.
- Please discuss make up work options with your teachers.
- Student Attendance Review Team
- Irregular attendance including but not limited to excessive early sign outs, tardies and/or absences are grounds for referral to the Student Attendance Review Team (SART). A maximum of twelve (12) absences per year (both excused and unexcused) are allowed. Any more than twelve (12) absences per year will be deemed excessive and grounds for Administrative Review.

## ADDITIONAL INFORMATION

## Personal Property, Mobile Phones and Devices

## Personal Property

- Students who bring personal property onto campus do so at their own risk. SAIS will not be held liable for lost, damaged or stolen items.

## Mobile Phones

- Mobile phones must not be seen after students enter the building in the morning, up until they leave in the afternoon. Mobile phones that are heard and/or used without permission during school hours will be confiscated and sent to the Boys \& Girls School Supervisor Offices. If mobile phones are permitted to be used for educational purposes, the teacher/supervisor will communicate this with their students.

## Bring Your Own Device (B.Y.O.D.) Grades 9-12

- At SAIS we encourage students to engage with the curriculum and utilize $21^{\text {st }}$ century skills to support their learning both inside and outside of the classroom. With this in mind, students are requested to bring their own devices to school when their class is assigned device time. Devices will only be used to support student engagement with such classroom tools like Canva, Google Classroom, Kahoot, Blooket, Quizziz, Virtual Labs, etc. Students are expected to use their devices only when instructed by their teachers and to maintain proper usage following the school Code of Conduct policy and Cyber Bullying laws.

## Computer Use, Extra Curriculars, Volunteer Program

## Computer Use:

- In order to facilitate academic research endeavors, SAIS AUH provides restricted internet access. While the benefits gained from this service are clearly enormous, there is a potential for abuse. In order to continue this service, we ask that all students, staff and visitors sign an "Internet User Policy" wherein they agree to access only academically appropriate programs, material and content. Failure to abide by this agreement may lead to disciplinary action.

## Extracurricular Activities:

- Each term students are offered various opportunities afterschool that will encourage their growth in the arts, revision classes, and/or sports. Students will also be afforded numerous opportunities to take part in programs that encourage leadership and teamwork such as Model UN (Model United Nations and Model Congress and similar programs.

## Volunteer Requirement:

- In line with American Curriculum standards, graduates of SAIS are required to have completed 40 hours or volunteer hours by the end of their senior year. This requirement is intended to help support our high school seniors when they start completing their resumes and applying for colleges. Volunteer opportunities can be arranged by the student or in collaboration with the Schools Career Counselor. Students can volunteer at local mosques, museums, libraries, schools, amusement parks, local business and various other locations. Students must present a certificate noting the time spent volunteering signed by a manager or owner of the company where the time was spent.
